LIGHTING

Nowodvorski
LIGHTING

Zmena a svetlo sú neoddeliteľne spojené. Deň sa mení na noc a noc na deň. Rozsvietením sa večer z obývačky stáva miesto na rodinné stretnutia či posedenie s priateľmi pri spoločenských hrách. Keď sa neskôr pohodlne usadíte v kresle a rozsvietite svoju stojanovú lampu, miestnosť stíchne. Môžete sa tak zahĺbiť do prežívania osudov obľúbených literárnych postáv.

Dnes si posvietime aj na zmeny v našej vizuálnej identite; sú moderné a lahodia oku presne tak, ako naše svietidlá... V jednom symbole spájame všetky atribúty, ktoré si naši zákazníci a obchodní partneri najviac cenia: možnosť vytvoriť skvelý dizajn interiérov vďaka svetelným doplnkom a nastaviteľným systémom. Dúfame, že z písmena „N“ v našom logu pozostávajúceho zo svetelných lúčov sa stane viac než len obyčajná značka či priezvisko. Veríme, že v každom dome i firme s našimi svietidlami a zostavami zdôrazní zásadu, čo nás najviac ženie vpred: „N“ ako „Nič nám nezabráni neustále tvoriť.“

Vitajte v novom svete, kde sa z bežných inštalatérov osvetlenia stávate tvorcami.

Изменения и свет неразрывно связаны - день превращается в ночь, а ночь - в день. Когда вы освещаете свою гостиную вечером, она может стать местом для ваших любимых настольных семейных игр или встреч с друзьями. А если потом садитесь в удобном кресле и включаете стоящую рядом лампу, гостиная превратится в тихое место для чтения, и вы будете сосредоточенно следить за героями книги.

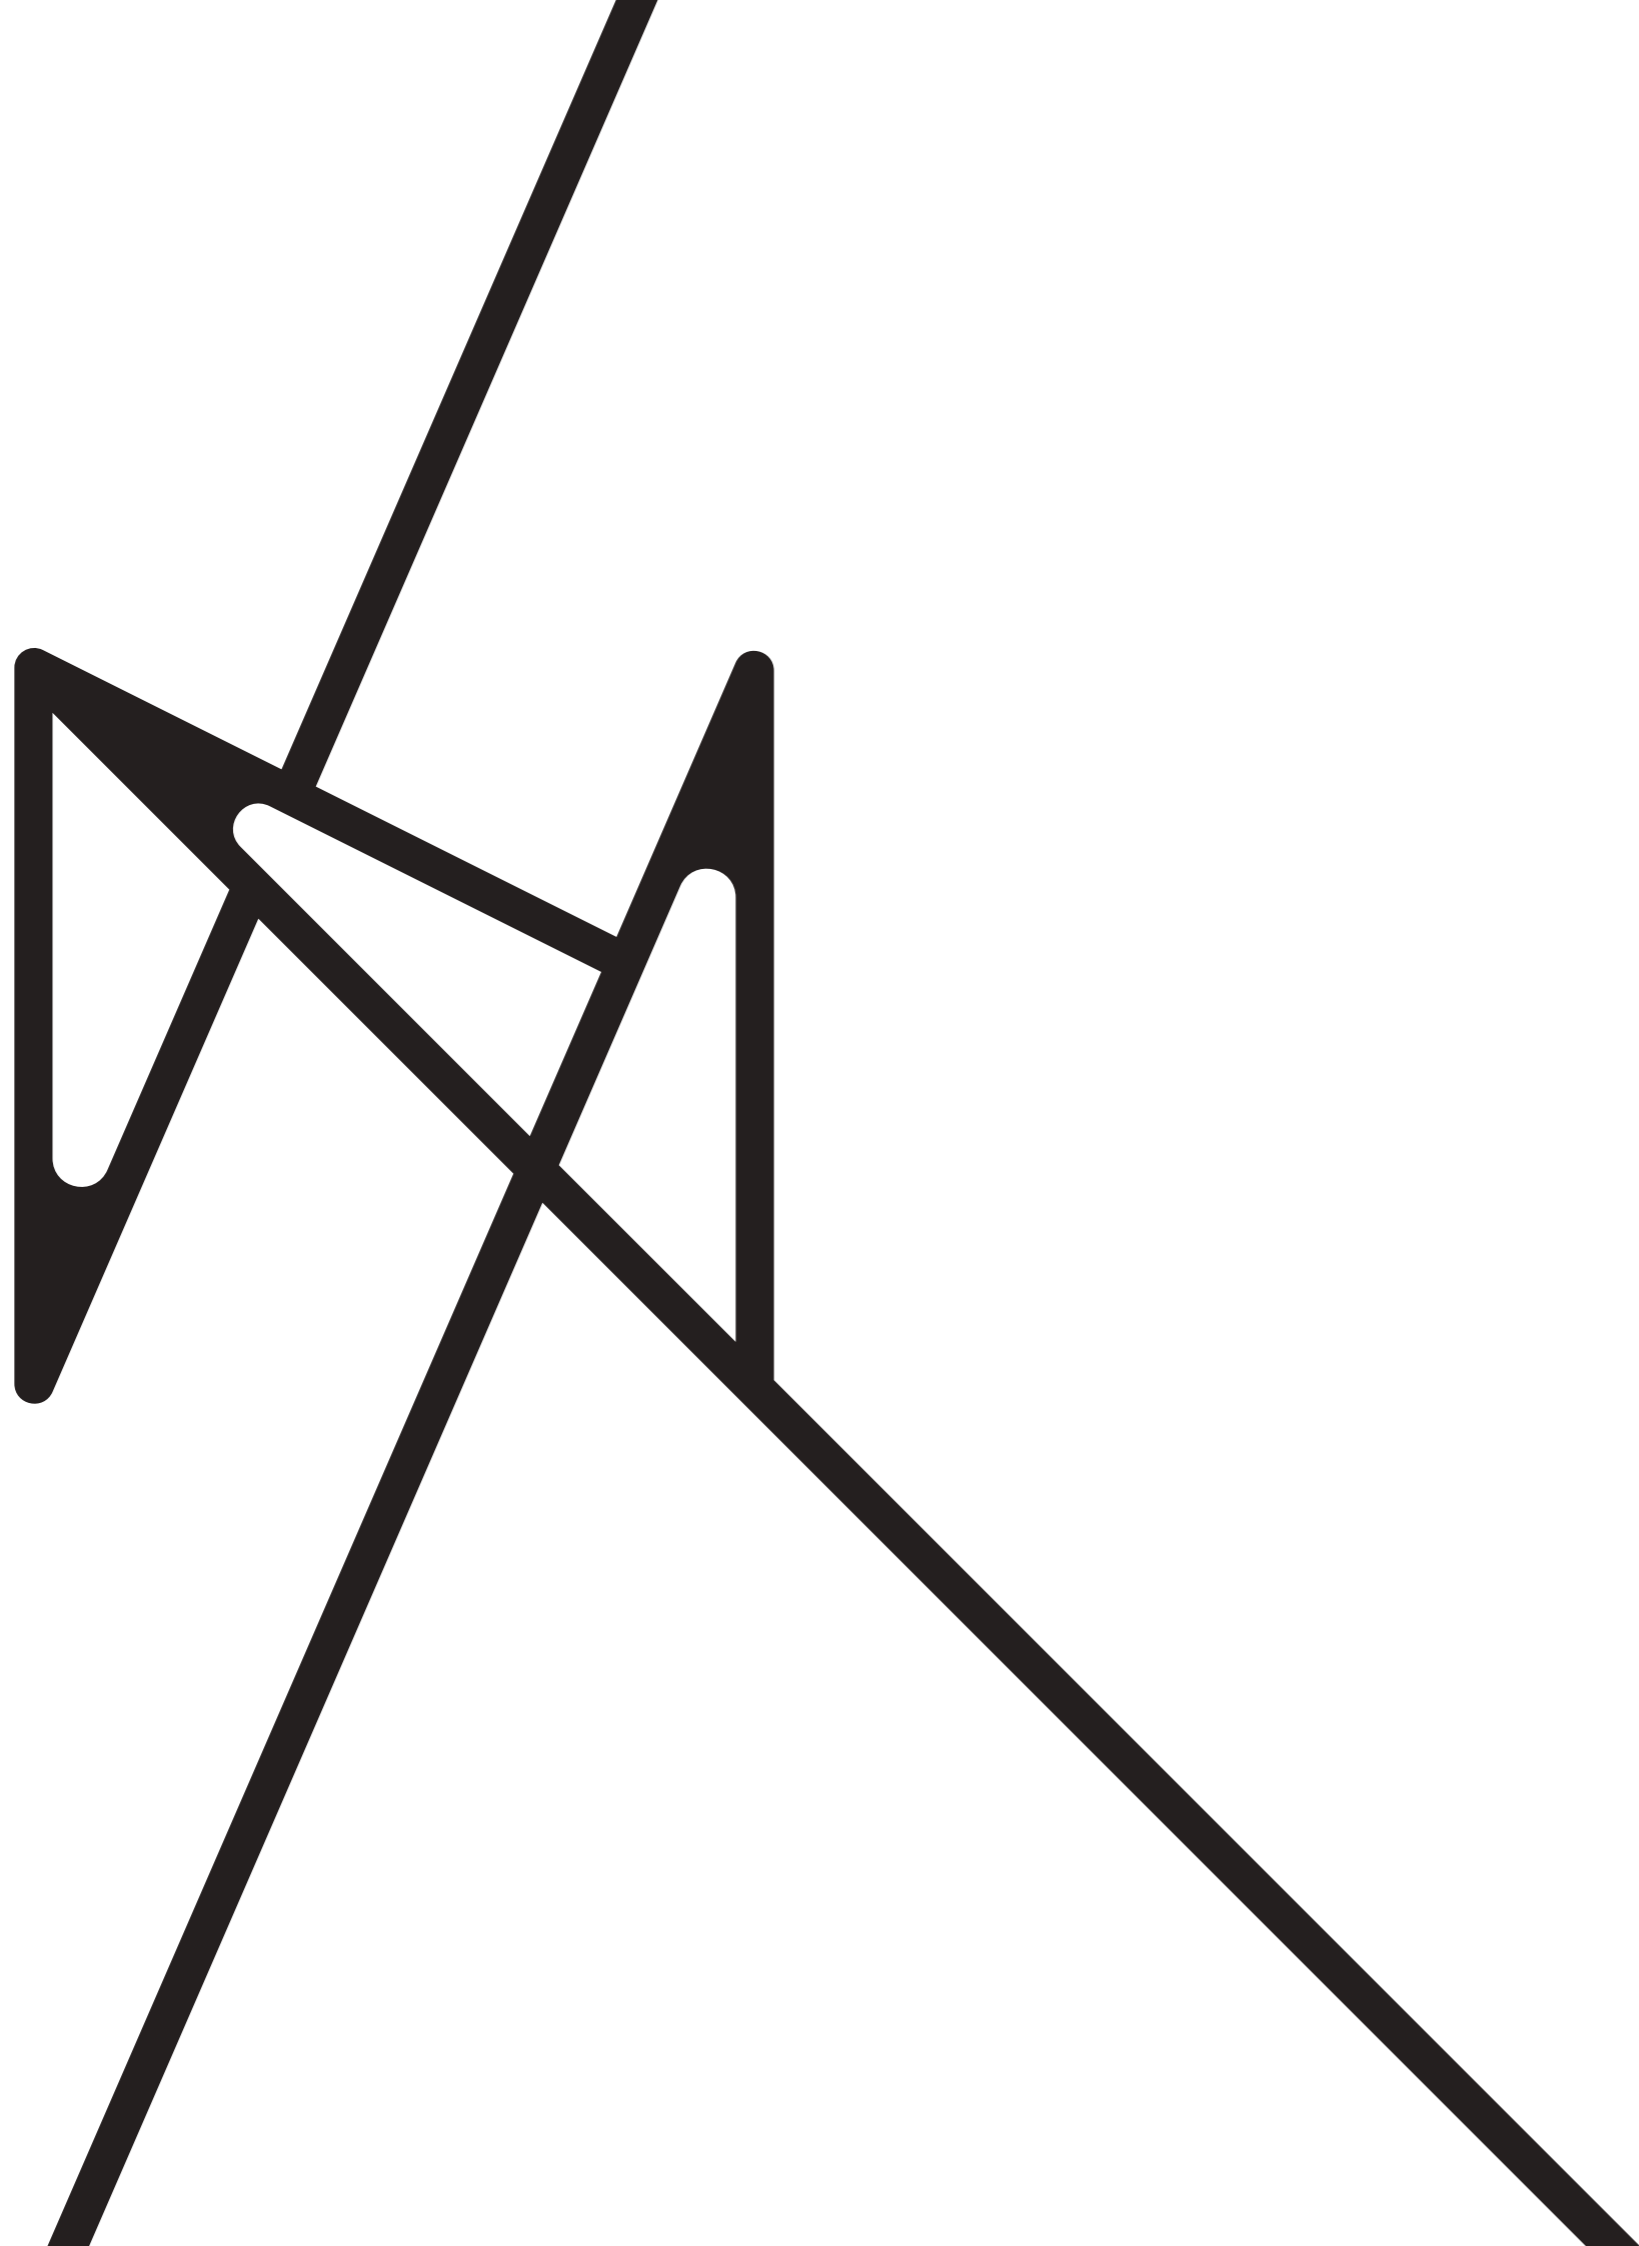

Сегодня мы проливаем свет на... изменения - на нашу новую визуальную идентификацию. Современную. Привлекающую внимание. Как наше освещение. С помощью одного символа мы хотели отразить то, что наши Клиенты и Партнеры больше всего ценят: возможность создавать интерьеры с хорошим дизайном с помощью наших светильников и конфигурируемых систем. Мы надеемся, что логотип «N» на штампе, состоящий из лучей света, будет не только ссылкой на фамилию и бренд. Надеемся, что в каждом доме и каждой компании, где появятся наши решения, он подчеркнет то, что движет развитием: «N» означает «Творчеству нет предела».

Мы приглашаем вас в мир, где вы создаете освещение, а не просто устанавливаете его.

Change and light are inextricably connected - day turns to night and night turns to day. When you light up a living room in the evening, it becomes a place for family gatherings or game nights with friends. Later, you sit comfortably in an armchair and turn on the floor lamp which changes your room into a quiet and peaceful space for reading so, that you can follow the story of your favourite characters.

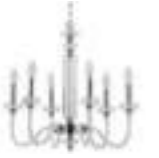

Today, we also direct light onto changes in our new visual identity; modern and eye-catching just like our lighting... In one symbol, we wanted to incorporate all of the features, that our customers and partners admire the most; the possibility to create well designed interiors using our lighting fixtures and configurable systems. We hope that the "N" which is composed of light beams in our logo will be more than merely a reference to the surname or brand. We believe, that in every home and company, where our solutions appear, it will emphasise what drives our development: "N" as in "Nothing can stop us from being creative".

Welcome to a new world, where you create lighting and don't just install it.

Can be used in the bathroom

WHITE BLACK

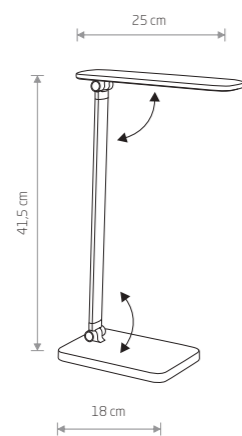

53,90 €

- Indukcyjne ładowanie smartphona (5V 1A)
- Możliwość wyboru temperatury barwowej światła w przedziałach 3000K - 6000K
- Włącznik dotykowy z funkcją ściemniania
- Port USB umożliwiający ładowanie telefonu

- Wireless charger for smartphones (5V 1 A)
- Possibility to choose the colour temperature of light in the range from 3000K to 6000K
- Touch switch with dimming function
- USB port for charging mobile phones

- Индуктивная зарядка смартфона (5 В, 1 А)
- Возможность выбора температуры света в диапазоне 3000К - 6000К
- Сенсорный переключатель с функцией затемнения
- USB-вход для зарядки телефона.

Prípojnicový žľabový systém by mal byť elektricky rovnomerne zaťažený a svietidlá rovnomerne rozmiestnené po jeho dĺžke.
The track light system should be evenly electrically loaded and the fittings should be evenly placed along its length.
Система шинопроводов должна быть равномерно электрически нагружена, а светильники - равномерно распределены по её длине

Maximálna dĺžka jedného okruhu prípojnicového systému PROFIL - 20 m a maximálne elektrické zaťaženie - 1500 W The maximum length of one circuit of track light system PROFIL - 20 m, and the maximum circuit power load - 1500W
Допустимая макс. длина системы шинопровода - 20 м, максимальная электрическая нагрузка - 1500W

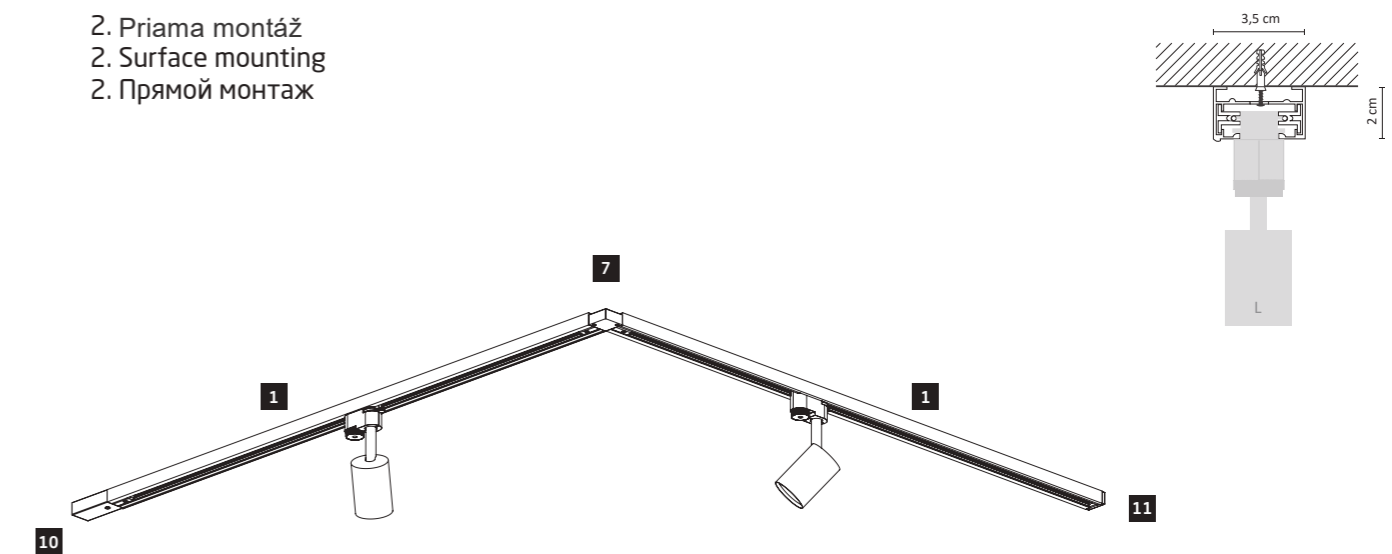

WHITE BLACK

Spôsoby montáže / Installation methods / Методы монтажа

- 1. Zavesenie na oceľové drôty
- 1. Suspended on steel wires
- 1. Подвеска на стальных тросах

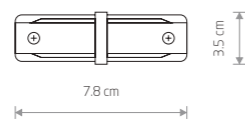

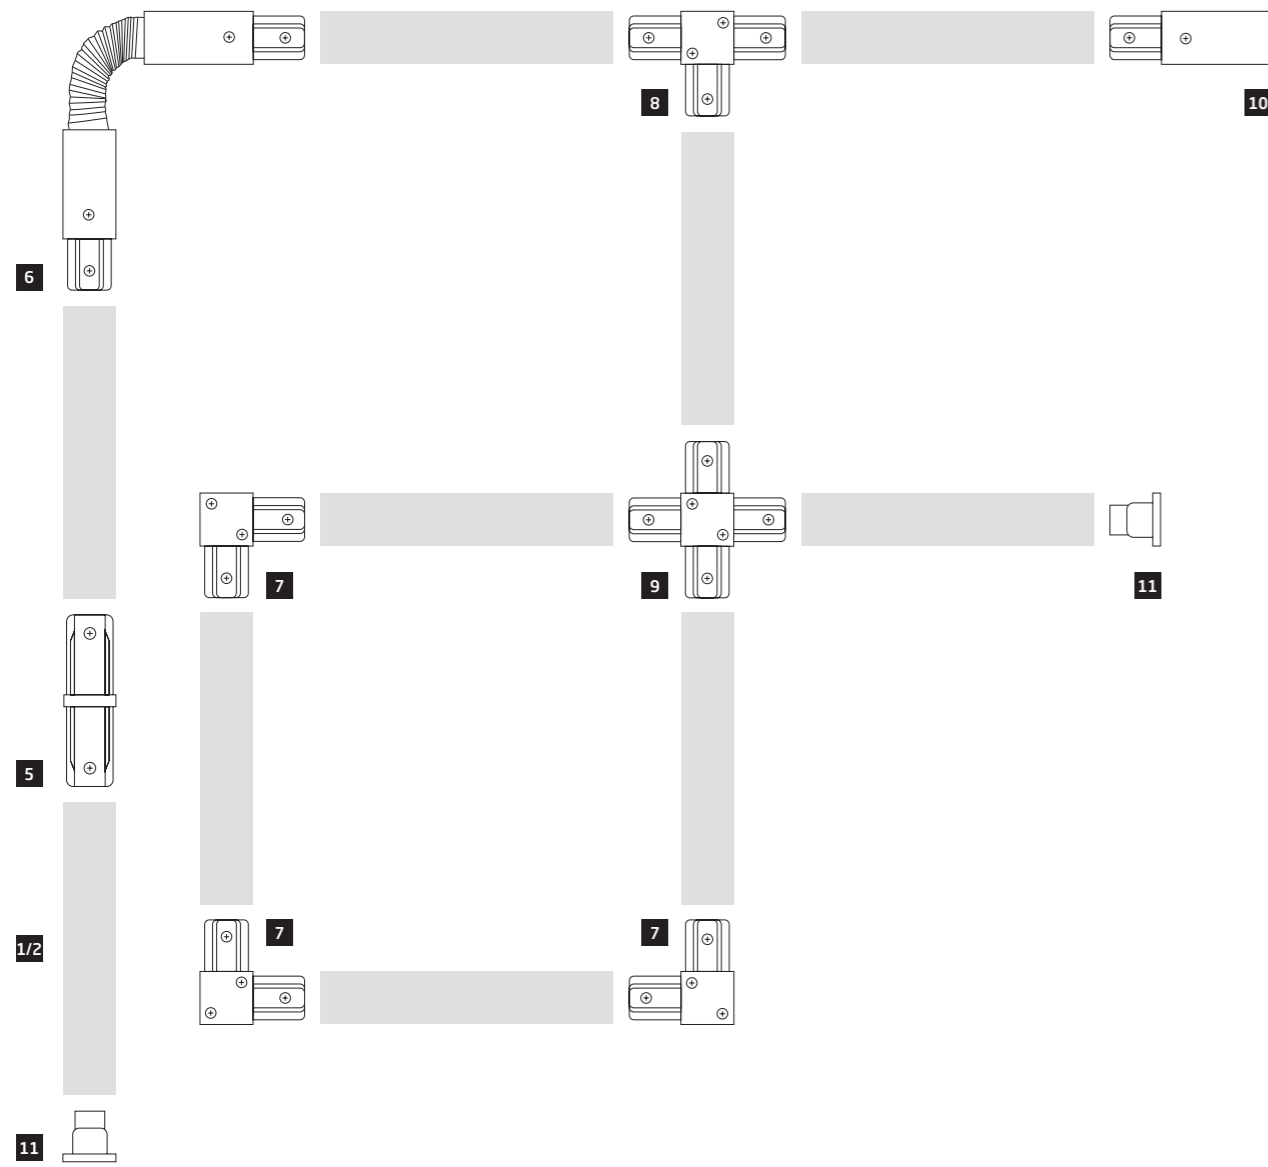

- 2. Priama montáž
- 2. Surface mounting
- 2. Прямой монтаж

Odporúčaná vzdialenosť medzi upevňovacími prvkami koľajníc je 1000 mm.
The recommended distance between tracks fasteners is 1000 mm
Рекомендуемое расстояние между креплениями не более 1000 мм

INFORMÁCIE PRE ZÁKAZNÍKOV / CUSTOMER INFORMATION / ИНФОРМАЦИЯ ДЛЯ КЛИЕНТОВ

Všeobecné informácie / General information / Главная Информация

Skutočné parametre produktov sa môžu od katalógových hodnôt líšiť o +/- 10%. The actual product parameters may differ from the values declared in the catalogue by +/- 10%. Фактические параметры товаров могут отличаться от заявленных в каталоге значений на +/- 10%.

Fotografie v tomto katalógu sú len ilustračné.

Pre použitú tlačiarenskú technológiu sa skutočná farba môže od katalógu mierne líšiť.

Photos in this catalogue are for illustrative purposes only.

The actual color of the products may slightly differ from that shown in the photos, due to the printing technology.

Фотографии представленного ассортимента в этом каталоге в качестве иллюстрации.

Фактический цвет продуктов может незначительно отличаться от представленного на фотографиях из-за технологии печати.

Technické informácie / Technical information / Техническая информация

Teplota/farba svetla (K) - bežne sa ňou rozumie farba bieleho svetla vyžarovaného zdrojom, napr. zdrojom LED.

Jednoducho ich môžeme rozdeliť na:

- teplú bielu
- bielu (neutrálnu)
- studenú bielu

Colour temperature (K) in common understanding is the colour of white light emitted by a source, for example such as an LED source.

In simple terms, we can divide them into:

- Warm white
- White
- Cool white

Цветовая температура (K) в общепринятом понимании - это «цвет» белого света, излучаемого источником, например светодиодом.

Проще говоря, мы можем разделить их на:

- Теплый белый
- Белый
- Холодный белый

2700-3300K

3400-5300K

5400-7000K

Teplá biela
Warm white
Теплый белый

Biela neutralna
White
Белый

Studená biela
Cool white
Холодный белый

Svetelný tok (lm/lumen) - rozumie sa ním celková sila svetla vyžarovaného zdrojom. Lumen je jednotkou svetelného toku v SI sústave.

Luminous flux (lm / lumen) - the total power of light emitted from a light source. Lumen (symbol: lm) - the unit of luminous flux in SI system.

1 lm = 1 cd·sr

Световой поток (лм / люмен) - общая мощность света, излучаемого данным источником света. Люмен (лм) - единица светового потока в системе СИ.

1 lm = 1 cd·sr

Vyžarovanie (lx/luks) - hustota svetelného vyžarovania na danom povrchu. Luks (lx) - jednotka vyžarovania v SI sústave..

$1 \text{ lx} = 1 \text{ cd} \cdot \text{sr} / \text{m}^2$

Illuminance (lx / lux) - in common understanding, it is the density of the luminous flux incident on a given surface. Lux (lx) - a unit of illuminance in the SI system.

$1 \text{ lx} = 1 \text{ cd} \cdot \text{sr} / \text{m}^2$

Освещенность (лк / люкс) - плотность светового потока на заданную площадь. Единица освещенности в системе СИ. $1 \text{ lx} = 1 \text{ cd} \cdot \text{sr} / \text{m}^2$

CRI (z ang. colour rendering index), Ra - schopnosť svetelného zdroja rozlišovať farby. Určuje vnímanie vyžarovaných farieb. Im wskaźnik ten jest wyższy, tym barwy są lepiej oddawane, a oświetlane przedmioty wyglądają naturalniej.

Wyrażony jest liczbą z przedziału od 0 do 100, gdzie 100 to światło słoneczne.

Minimum wg przepisów w UE dla opraw wewnętrznych to 80.

CRI- is an index of a light source's ability to reveal colours. It determines how well illuminated colours are perceived. The higher index, the better colour rendering and the illuminated objects look more natural.

It is expressed with a number from 0 to 100, where 100 is a sunlight.

The minimum according to EU regulations for indoor luminaires is 80.

CRI (colour rendering index) Индекс цветопередачи, характеризующий источник света, который определяет, насколько хорошо воспринимаются цвета освещенных объектов. Чем выше этот индекс, тем лучше передаются цвета и освещенные объекты выглядят естественнее.

Он выражается числом от 0 до 100, где 100 - солнечный свет.

Минимальное требование ЕС для светильников для внутреннего освещения - 80.

Stupeň ochrany IP / Degree of protection IP / Степень защиты IP

Stupeň ochrany vyjadrujú dve hodnoty. Prvá udáva ochranu pred časticami, druhá ochranu pred tekutinami.

Degree of protection is expressed by two figures. The first one stands for protection against solid particles. The second one for protection against liquids.

stands

Степень защиты выражается двумя цифрами. Первая цифра относится к защите от твердых веществ, вторая, к защите от жидкостей.

1 cyfra / 1st figure / 1-ая цифра	
IP0...	Bez ochrany / Not protected / Нет защиты
IP1...	Ochrana pred pevnými predmetmi väčšími ako 50 mm / Protected against solid objects greater than 50 mm / Защита от попадания твердых веществ \varnothing 50 мм
IP2...	Ochrana pred pevnými predmetmi väčšími ako 12 mm / Protected against solid objects greater than 12 mm / Защита от попадания твердых веществ \varnothing 12 мм
IP3...	Ochrana pred pevnými predmetmi väčšími ako 2,5 mm / Protected against solid objects greater than 2,5 mm / Защита от попадания твердых веществ \varnothing 2,5 мм
IP4...	Ochrana pred pevnými predmetmi väčšími ako 1 mm / Protected against solid objects greater than 1 mm / Защита от попадания твердых веществ \varnothing 1 мм
IP6...	Ochrana pred prachom / Protected against dust infiltration / Защита от попадания пыли
2 cyfra / 2nd figure / 2-ая цифра	
IP...0	Bez ochrany / Not protected / Нет защиты
IP...1	Ochrana pred padajúcimi kvapkami vody / Protected against vertically falling water drops / Защита от попадания капель воды в вертикальном падении
IP...2	Ochrana pred padajúcimi kvapkami vody pri vychylení do 15° / Protected against falling water drops up to 15° from the vertical / Защита от попадания капель воды под углом не более 15°
IP...3	Ochrana pred dažďovou vodou / Protected against rain / Защита от дождя
IP...4	Ochrana pred striekajúcou vodou / Protected against splashing water / Защита от брызг воды
IP...5	Ochrana pred prúdom vody / Protected against water jets / Защита от струи воды
IP...6	Ochrana pred krúpmi / Protected against powered water jets / Защита от сильной струи воды
IP...7	Ochrana proti ponoreniu / Protected against temporary immersion / Защита от временного погружения
IP...8	Ochrana proti hlbokému ponoru / Protected against continuous immersion / Защита от продолжительного погружения

IKONY / ICONS / ИЗОБРАЖЕНИЯ

	Závesné svietidlo / Pendant lamp / Подвесные светильники		Nástenné svietidlo / Wall lamp / Настенные светильники		Zápusťné nástenné svietidlo / Recessed wall lamp / Встраиваемые настенные светильники
	Stropné svietidlo / Ceiling lamp / Потолочные светильники		Bodové svietidlo / Spotlight / Точечные светильники		Svetelný zdroj / Light source / Источник света
	Stolná lampa / Table lamp / Настольные лампы		Podtynková lampa sufitová / Recessed ceiling lamp / Встраиваемые потолочные светильники		LED trubica / Led tube / Светодиодная лампа
	Lampa podłogowa / Floor lamp / Торшеры		Zabudované svietidlo / Overrun lamp / Встраиваемые дорожные светильники		Vypínač / Cut out / Вырезать

 Doplnky označené tým symbolom nesmú byť prekryté tepelným izolačným materiálom. Fittings marked with this symbol must not be covered with thermal insulation materials. Светильники, обозначенные этим символом, нельзя покрывать термоизоляционным материалом.

 Trieda ochrany II znamená dvojitú ochrannú izoláciu armatúry. Protection class II means that the fittings are equipped with a double protective insulation, and the green and yellow protective conductor must not be connected to the fitting. Второй защитный класс обозначает светильник с двойной защитной изоляцией, а защитный желто-зеленый провод не должен подключаться к светильнику.

 Klasa ochronna pierwsza oznacza, że oprawa musi być podłączona za pomocą przewodu ochronnego (żyła żółto-zielona) do przewodu lub zacisku uziemiającego. Protection class I means that the fitting must be connected with the yellow and green protective conductor to the grounding wire or terminal. Первый защитный класс обозначает, что светильник должен быть подключен с помощью защитного желто-зеленого провода к заземленному проводу или зажиму.

 Klasa ochronna III oznacza, bezpieczeństwo elektryczne gwarantowane przez bardzo niskie zasilanie (poniżej 50 V). Bez uziemienia. Protection class III means, that electrical safety is guaranteed by a very low power supply (less than 50 Volt). No grounding. Класс III электрическая безопасность гарантирована подачей электроэнергии низкого напряжения (меньше чем 50 вольт).

 Oprawy oznaczone tym symbolem wolno instalować wyłącznie na podłożach niepalnych. Fittings marked with this symbol are suitable for installation only on nonflammable surfaces. Светильники, обозначенные этим символом, можно устанавливать только на негорючих поверхностях.

 Zgodność produktów z ukraińskimi normami. Ukrainian standards compliant. Соответствие продукции украинским стандартам.

 Zgodność z normami Unii Europejskiej. EU standards compliant. Соответствие стандартам Европейского Союза.

 Zgodność produktów z normami Euroazjatyckiej Unii Gospodarczej. EAEU standards compliant. Соответствие продукции стандартам Евразийского экономического союза.

 Do użytku zewnętrznego. Interior use only. Для внешнего использования.

 Do wewnętrznego użytku. Exterior use only. Для внутреннего использования.

 Do stosowania wewnątrz i na zewnątrz. Interior and exterior use. Для внутреннего и внешнего использования.

 Zużyte oprawy oświetleniowe są surowcami wtórnymi - nie wolno wyrzucać ich do pojemników na odpady domowe, mogą zawierać substancje niebezpieczne dla zdrowia i życia ludzkiego oraz środowiska. Zgodnie z dyrektywą WEEE 2012/19/UE użytkownik zobowiązany jest do oddania opraw do punktu zbierania zużytego sprzętu, co przyczyni się do ochrony środowiska naturalnego. Used lighting fixtures are recyclable materials - they must not be disposed of in household waste containers as they may contain substances hazardous to human health or life as well as to the natural environment. In accordance with Regulation WEEE 2012/19 /EU, luminaire user is obliged to return a used lighting fixture to a waste appliance collection point, which will contribute to the protection of the natural environment.

 Isпользованные осветительные приборы являются вторсырьем, их нельзя выбрасывать в контейнеры с хозяйственными отходами, потому что они могут содержать в себе вещества, опасные для здоровья и жизни человека, и вредные для окружающей среды. Согласно директиве WEEE 2012/19/UE, потребитель обязан сдать осветительные приборы в пункт сбора использованного оборудования, что положительно влияет на окружающую среду.

Material	Material	Материал
Acrylic crystals	Akrylové kryštály	Акриловые кристаллы
Aluminum	Hliník	Алюминий
Braided cable	Kábel	Плетеный кабель
Brass plated steel	Mosadzovaná oceľ	Сталь с латунным покрытием
Brushed stainless steel	Brúsená nehrdzavejúca oceľ	Матовая нержавеющая сталь
Ceramic housing	Keramická luneta	Керамический патрон
Chrome	Chróm	Хром
Chrome plated steel	Chrómovaná oceľ	Хромистая сталь
Composite	Kompozit	Композитный материал
Concrete	Betón	Архитектурный бетон
Copper plated steel	Oceľ s meďou	Сталь плакированная медью
Crystal	Kryštál	Кристаллы
Fabric	Tkanina	Ткань
Flexible stem	Peszel	Пешель
Glass	Sklo	Стекло
Gypsum	Sadra	Гипс
Metallized glass	Kované sklo	Металлизированное стекло
Painted aluminum	Lakovaný hliník	Окрашенный алюминий
Painted steel	Lakovaná oceľ	Лакированная сталь
Plastic	Plast	Пластик
Plastic ABS	ABS	АБС-пластик
